CEQA Initial Study - Environmental Checklist Form (Based on the State CEQA Guidelines, Appendix G Rev. 10/04)

1. Project Number(s)/Environmental Log Number/Title:

P02-027, Log No. 03-08-044 – Old San Marcos (Twin Oaks) Schoolhouse

2. Lead agency name and address:

County of San Diego, Department of Planning and Land Use 5201 Ruffin Road, Suite B, San Diego, CA 92123-1666

- 3. a. Contact Gail Wright, Project Manager
 - b. Phone number: (858) 694-3003
 - c. E-mail: gail.wright@sdcounty.ca.gov.
- 4. Project location:

The project is located at 236 Deer Springs Road, San Marcos, 92069. It is in the North County Metro community planning group area, the Twin Oaks Sponsor group area and is in the unincorporated area of the County of San Diego

Thomas Brothers Coordinates: Page 1108, Grid H/1

5. Project Applicant name and address:

Goodson Family Trust Attn: Karen Tork 236 Deer Springs Road San Marcos, CA 92069

6. General Plan Designation

Community Plan: North County Metro, Twin Oaks Sponsor group

Land Use Designation: 17 (Estate Residential)

Density: 1 du/2, 4 acre(s)

7. Zoning

Use Regulation: A70 Limited Agriculture

Minimum Lot Size: 4 acre(s)
Special Area Regulation: None

8. Description of project

The project is a Major Use Permit (pursuant to Section 2705 of the Zoning Ordinance) to allow community events and activities including cultural exhibits, private parties such as weddings, receptions, and public meetings within a property that already includes a restored historic school house. The project is 2.87 acres in size and in addition to the school house, consists of an adjacent covered patio, orchard, parking lot and several farming type outbuildings. No changes to the existing facilities are proposed. The project site is located on 236 Deer Spring Road in the North County Metro Community Planning Group and the Twin Oaks Sponsor group, within unincorporated San Diego County. The site is subject to the General Plan Regional Category Environmentally Constrained Area (ECA), Land Use Designation (17) Estate Residential. Zoning for the site is A70. The site contains an historic school house, originally constructed in 1891 and served as an elementary school, grades K through 8 until 1943, several outbuildings, orchard, parking lot and mature landscaping, all of which will be retained. Access would be provided by a driveway connecting to Deer Springs Road. The project is currently served by an on-site septic system and imported water from the Vallecitos Water District. However, the project will be conditioned to be connected to the public sewer line at Deer Springs Road fronting the property (Vallecitos Water District). No earthwork will be required as no grading, construction or removal of structures is proposed. No off-site improvements are required by the project; however, an Irrevocable Offer of Dedication for real property is required to accommodate the proposed expansion of Deer Springs Road.

9. Surrounding land uses and setting (Briefly describe the project's surroundings):

Lands surrounding the project site are used for agriculture, field crops and orchards. The topography of the project site and adjacent land is relatively flat farm lands. The jurisdiction of San Marcos is located directly to the south. The site is located within one mile of State Route S12, Twin Oaks Valley Road, and approximately 1½ miles west of Interstate 15.

10. Other public agencies whose approval is required (e.g., permits, financing approval, or participation agreement):

Permit Type/Action	<u>Agency</u>	
Major Use Permit	County of San Diego	

ENVIRONMENTAL FACTORS POTENTIALLY AFFECTED: The environmental

factors checked below would be potentially affected by this project and involve at least one impact that is a "Potentially Significant Impact" or a "Potentially Significant Impact Unless Mitigation Incorporated," as indicated by the checklist on the following pages.				
□ Bid □ Ha □ Mid □ Pu	sthetics blogical Resources zards & Haz. Materials neral Resources blic Services lities & Service	□ Agriculture Resource □ Cultural Resource □ Hydrology & Wate Quality □ Noise □ Recreation □ Mandatory Finding	e <u>r</u>	□ Air Quality □ Geology & Soils □ Land Use & Planning □ Population & Housing □ Transportation/Traffic
	ERMINATION: (To be come basis of this initial eval		Agency)	
	On the basis of this Initial Study, the Department of Planning and Land Use finds that the proposed project COULD NOT have a significant effect on the environment, and a NEGATIVE DECLARATION will be prepared.			
On the basis of this Initial Study, the Department of Planning and Land Use finds that although the proposed project could have a significant effect on the environment, there will not be a significant effect in this case because revisions in the project have been made by or agreed to by the project proponent. A MITIGATED NEGATIVE DECLARATION will be prepared.				
On the basis of this Initial Study, the Department of Planning and Land Use finds that the proposed project MAY have a significant effect on the environment, and an ENVIRONMENTAL IMPACT REPORT is required.

INSTRUCTIONS ON EVALUATION OF ENVIRONMENTAL IMPACTS

- 4 -

- 1. A brief explanation is required for all answers except "No Impact" answers that are adequately supported by the information sources a lead agency cites in the parentheses following each question. A "No Impact" answer is adequately supported if the referenced information sources show that the impact simply does not apply to projects like the one involved (e.g., the project falls outside a fault rupture zone). A "No Impact" answer should be explained where it is based on project-specific factors as well as general standards (e.g., the project will not expose sensitive receptors to pollutants, based on a project-specific screening analysis).
- 2. All answers must take account of the whole action involved, including off-site as well as on-site, cumulative as well as project-level, indirect as well as direct, and construction as well as operational impacts.
- 3. Once the lead agency has determined that a particular physical impact may occur, then the checklist answers must indicate whether the impact is potentially significant, potentially significant unless mitigation incorporated, or less than significant. "Potentially Significant Impact" is appropriate if there is substantial evidence that an effect may be significant. If there are one or more "Potentially Significant Impact" entries when the determination is made, an EIR is required.
- 4. "Potential Significant Unless Mitigation Incorporated" applies where the incorporation of mitigation measures has reduced an effect from "Potentially Significant Impact" to a "Less Than Significant Impact." The lead agency must describe the mitigation measures, and briefly explain how they reduce the effect to a less than significant level.
- 5. Earlier analyses may be used where, pursuant to the tiering, program EIR, or other CEQA process, an effect has been adequately analyzed in an earlier EIR or negative declaration. Section 15063(c)(3)(D). In this case, a brief discussion should identify the following:
 - Earlier Analysis Used. Identify and state where they are available for review.
 - b) Impacts Adequately Addressed. Identify which effects from the above checklist were within the scope of and adequately analyzed in an earlier document pursuant to applicable legal standards, and state whether such effects were addressed by mitigation measures based on the earlier analysis.
 - c) Mitigation Measures. For effects that are "Potentially Significant Unless Mitigation Incorporated," describe the mitigation measures that were incorporated or refined from the earlier document and the extent to which they address site-specific conditions for the project.
- 6. Lead agencies are encouraged to incorporate into the checklist references to information sources for potential impacts (e.g., general plans, zoning ordinances). Reference to a previously prepared or outside document should, where appropriate, include a reference to the page or pages where the statement is substantiated.
- 7. The explanation of each issue should identify:
 - a) The significance criteria or threshold, if any, used to evaluate each question; and
 - b) The mitigation measure identified, if any, to reduce the impact to less than significance

	Initial Study, 27, Log No. 03-08-044	- 5 -	August 3, 2006
	THETICS Would the project: Have a substantial adverse effect o	on a scenic	: vista?
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact
Discus	sion/Explanation:		
No Impact: Scenic vistas are singular vantage points that offer unobstructed views of valued viewsheds, including areas designated as official scenic vistas along major highways or County designated visual resources. Based on a site visit completed by staff on January 22, 2003, the proposed project is not located near or visible from a scenic vista and will not change the composition of an existing scenic vista. The project site is located in the Twin Oaks sponsor group area of north county surrounded by agricultural lands. Therefore, the proposed project will not have any substantial adverseffect on a scenic vista.			
•	Substantially damage scenic resou outcroppings, and historic building		<u> </u>

☐ Potentially Significant Impact

Mitigation Incorporated

Potentially Significant Unless

No Impact: State scenic highways refer to those highways that are officially designated. A scenic highway is officially designated as a State scenic highway when the local jurisdiction adopts a scenic corridor protection program, applies to the California Department of Transportation for scenic highway approval, and receives notification from Caltrans that the highway has been designated as an official Scenic Highway. Based on a site visit completed by staff on January 22, 2003, the proposed project is not located near or visible within the same composite viewshed as a State scenic highway and will not change the visual composition of an existing scenic resource within a State scenic highway. Generally, the area defined within a State scenic highway is the land adjacent to and visible from the vehicular right-of-way. The dimension of a scenic highway is usually identified using a motorist's line of vision, but a reasonable boundary is selected when the view extends to the distant horizon. The project site is surrounded by farms and orchards. In addition, no new construction is proposed to an existing facility. Therefore, the proposed project will not have any substantial adverse effect on a scenic resource within a State scenic highway.

Less than Significant Impact

No Impact

c) Substantially degrade the existing visual character or quality of the site and its surroundings?

CEQA Initial Study, P02-027, Log No. 03-08-044	- 6 -	August 3, 2006
☐ Potentially Significant Impact ☐ Potentially Significant Unless ☐ Mitigation Incorporated		Less than Significant Impact No Impact
Discussion/Explanation:		
No Impact: The proposed project does environment, including landform modifically Use Permit (pursuant to Section 2705 of events and activities including cultural expreceptions, and public meetings within a historic school house. Therefore, the project site and surround	ation or cons the Zoning chibits, priva property tha oject will not	struction. The project is a Major Ordinance) to allow community te parties such as weddings, at already includes a restored
d) Create a new source of substantia day or nighttime views in the area		are, which would adversely affect
Potentially Significant Impact Potentially Significant Unless		Less than Significant Impact No Impact

Mitigation Incorporated

Less Than Significant Impact: The proposed project will use outdoor lighting. However, it will not adversely affect nighttime views or astronomical observations, because the project will conform to the Light Pollution Code (Section 59.101-59.115), including the 8-foot Victorian lamp type with 3,100 watt bulbs and shielding requirements per fixture and hours of operation limitations for outdoor lighting.

In addition, the proposed project will control outdoor lighting and sources of glare in the following ways:

- 1. The project will not install outdoor lighting that directly illuminates neighboring properties.
- 2. The project will not install outdoor lighting that would cast a direct beam angle towards a potential observer, such as a motorists, cyclist or pedestrian.
- 3. The project will not install outdoor lighting for vertical surfaces such as buildings, landscaping, or signs in a manner that would result in useful light or spill light being cast beyond the boundaries of intended area to be lit.
- 4. The project will not install any highly reflective surfaces such as glare-producing glass or high-gloss surface color that will be visible along roadways, pedestrian walkways, or in the line of sight of adjacent properties.

The project will not contribute to significant cumulative impacts on day or nighttime views because the project will conform to the Light Pollution Code. The Code was developed by the San Diego County Department of Planning and Land Use and Department of Public Works in cooperation with lighting engineers, astronomers, land use planners from San Diego Gas and Electric, Palomar and Mount Laguna observatories, and local community planning and sponsor groups to effectively address and minimize the impact of new sources light pollution on nighttime views. The standards in the Code are the result of this collaborative effort and establish an acceptable level for new lighting. Compliance with the Code is required prior to issuance of any building permit for any project. Mandatory compliance for all new building permits ensures that this project in combination with all past, present and future projects will not contribute to a cumulatively considerable impact. Therefore, compliance with the Code ensures that the project will not create a significant new source of substantial light or glare, which would adversely affect daytime or nighttime views in the area, on a project or cumulative level

In addition, the project's outdoor lighting is controlled through the Major Use Permit, which further limits outdoor lighting through strict controls. Therefore, compliance with the Code, in combination with the outdoor lighting and glare controls listed above ensures that the project will not create a significant new source of substantial light or glare.

<u>II. AGRICULTURE RESOURCES</u> -- In determining whether impacts to agricultural resources are significant environmental effects, lead agencies may refer to the California Agricultural Land Evaluation and Site Assessment Model (1997) prepared by the California Department of Conservation as an optional model to use in assessing impacts on agriculture and farmland. Would the project:

, 	Convert Prime Farmland, Unique Farml Importance Farmland), as shown on the Farmland Mapping and Monitoring Prog to non-agricultural use?	maps	s prepared pursuant to the
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact

Discussion/Explanation:

Less Than Significant Impact: The project site has land designated as Farm Land of Local and Statewide Importance. As a result, the proposed project was reviewed by staff and was determined not to have significant adverse project or cumulative level impacts related to the conversion of Prime Farmland, Unique Farmland, Farmland of Statewide Importance, or Farmland of Local Importance to a non-agricultural use for the following reasons: Because the site is already developed as a community use facility having existing structures. In addition, the project does not propose any additional

construction or change to its existing use. Therefore, no potentially significant project or cumulative level conversion of Prime Farmland, Unique Farmland, Farmland of Statewide Importance or Farmland of Local Importance to a non-agricultural use will occur as a result of this project.

b)	b) Conflict with existing zoning for agricultural use, or a Williamson Act contract?			
		Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact
Dis	cuss	sion/Explanation:		
which to rewith connection	ch is esult cor flict und	han Significant Impact: The project site considered to be an agricultural zone. It in a conflict in zoning for agricultural use mmunity use facilities and is a permitted with existing zoning for agricultural use. In a Williamson Act Contract. Therefore for agricultural use, or a Williamson Act	Howe se, be use in Addi e, ther	ever, the proposed project will not cause the site is already developed A70 zones and will not create a tionally, the project site's land is e will be no conflict with existing
c) Involve other changes in the existing environment, which, due to their location or nature, could result in conversion of Farmland, to non-agricultural use?				
		Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact

Discussion/Explanation:

Less Than Significant Impact: The project site and surrounding area within radius of three miles have land designated as A70. As a result, the proposed project was reviewed by staff and was determined not to have significant adverse impacts related to the conversion of Prime Farmland, Unique Farmland, Farmland of Statewide Importance or Farmland of Local Importance to a non-agricultural use for the following reasons: The project is an existing facility, and no new development is proposed. Therefore, no potentially significant project or cumulative level conversion of Prime Farmland, Unique Farmland, Farmland of Statewide Importance, or Farmland of Local Importance to a non-agricultural use will occur as a result of this project.

III. AIR QUALITY -- Where available, the significance criteria established by the applicable air quality management or air pollution control district may be relied upon to make the following determinations. Would the project:

a)	Conflict with or obstruct implementation Strategy (RAQS) or applicable portions		•
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact
Discu	ssion/Explanation:		
No Impact: Operation of the project will not result in emissions of significant quantities of criteria pollutants listed in the California Ambient Air Quality Standards or toxic air contaminants as identified by the California Air Resources Board. Therefore, the project will not conflict or obstruct with the implementation of the RAQS nor the SIP on a project or cumulative level.			
b)	Violate any air quality standard or contriprojected air quality violation?	bute s	substantially to an existing or
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact

Discussion/Explanation:

In general, air quality impacts from land use projects are the result of emissions from motor vehicles, and from short-term construction activities associated with such projects. The San Diego County Air Pollution Control District (SDAPCD) has established screening-level criteria for all new source review (NSR) in APCD Rule 20.2. For CEQA purposes, these screening-level criteria can be used as numeric methods to demonstrate that a project's total emissions (e.g. stationary and fugitive emissions, as well as emissions from mobile sources) would not result in a significant impact to air quality. Since APCD does not have screening-level criteria for emissions of volatile organic compounds (VOCs), the use of the screening level for reactive organic compounds (ROC) from the CEQA Air Quality Handbook for the South Coast Air Basin (SCAB), which has stricter standards for emissions of ROCs/VOCs than San Diego's, is appropriate. However, the eastern portions of the county have atmospheric conditions that are characteristic of the Southeast Desert Air Basin (SEDAB). SEDAB is not classified as an extreme non-attainment area for ozone and therefore has a less restrictive screening-level. Projects located in the eastern portions of the County can use the SEDAB screening-level threshold for VOCs.

Less Than Significant Impact: The project proposes a Major Use Permit to allow existing facilities to be used for community activities. However, grading operations associated with the construction of the project would be subject to County of San Diego Grading Ordinance, which requires the implementation of dust control measures.

Emissions from the construction phase would be minimal and localized, resulting in pollutant emissions below the screening-level criteria established by SDAPCD Rule 20.2 and by the South Coast Air Quality Management District (SCAQMD) CEQA Air Quality Handbook section 6.2 and 6.3. In addition, the vehicle trips generated from the project will result in 146 Average Daily Trips (ADTs). According to the Bay Area Air Quality Management District CEQA Guidelines for Assessing the Air Quality Impacts of Projects and Plans, projects that generate less than 2,000 ADT are below the Screening-Level Criteria established by SDAPCD Rule 20.2 and by the SCAQMD CEQA Air Quality Handbook section 6.2 and 6.3 for criteria pollutants. As such, the project will not violate any air quality standard or contribute substantially to an existing or projected air quality violation.

, (Result in a cumulatively considerable newhich the project region is non-attainment ambient air quality standard (including requantitative thresholds for ozone precur	ent und eleasii	der an applicable federal or state ng emissions which exceed
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact

Discussion/Explanation:

San Diego County is presently in non-attainment for the 1-hour concentrations under the California Ambient Air Quality Standard (CAAQS) for Ozone (O₃). San Diego County is also presently in non-attainment for the annual geometric mean and for the 24-hour concentrations of Particulate Matter less than or equal to 10 microns (PM₁₀) under the CAAQS. O₃ is formed when volatile organic compounds (VOCs) and nitrogen oxides (NO_x) react in the presence of sunlight. VOC sources include any source that burns fuels (e.g., gasoline, natural gas, wood, oil); solvents; petroleum processing and storage; and pesticides. Sources of PM₁₀ in both urban and rural areas include: motor vehicles, wood burning stoves and fireplaces, dust from construction, landfills, agriculture, wildfires, brush/waste burning, and industrial sources of windblown dust from open lands.

Less Than Significant Impact: Air quality emissions associated with the project include emissions of PM₁₀, NO_x and VOCs from construction/grading activities, and VOCs as the result of increase of traffic from operations at the facility. However, grading operations associated with the construction of the project would be subject to County of San Diego Grading Ordinance, which requires the implementation of dust control measures. Emissions from the construction phase would be minimal and localized, resulting in PM₁₀ and VOC emissions below the screening-level criteria established by SDAPCD Rule 20.2 and by the South Coast Air Quality Management District (SCAQMD) CEQA air quality handbook section 6.2 and 6.3. The vehicle trips generated from the project will result in 146 Average Daily Trips (ADTs). According to the Bay Area Air Quality Management District CEQA Guidelines for Assessing the Air

Quality Impacts of Projects and Plans, projects that generate less than 2,000 ADT are below the Screening-Level Criteria established by SDAPCD Rule 20.2 and by the SCAQMD CEQA air quality handbook section 6.2 and 6.3 for VOCs and PM₁₀.

In addition, a list of past, present and future projects within the surrounding area were evaluated and none of these projects emit significant amounts of criteria pollutants. Refer to XVII. Mandatory Findings of Significance for a comprehensive list of the projects considered. The proposed project as well as the past, present and future projects within the surrounding area, have emissions below the screening-level criteria established by SDAPCD Rule 20.2 and by the SCAQMD CEQA air quality handbook section 6.2 and 6.3, therefore, the construction and operational emissions associated with the proposed project are not expected to create a cumulatively considerable impact nor a considerable net increase of PM10, or any O₃ precursors.

a) I	Expose sensitive receptors to substantia	ı pollu	itant concentrations?	
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact	
Discus	sion/Explanation:			
Grade)	lity regulators typically define sensitive re, hospitals, resident care facilities, or day individuals with health conditions that would be used to be used.	y-care	centers, or other facilities that may	
recepto SCAQI project emissio	No Impact: Based a site visit conducted by staff on January 22, 2003, sensitive receptors have not been identified within a quarter-mile (the radius determined by the SCAQMD in which the dilution of pollutants is typically significant) of the proposed project. Furthermore, no point-source emissions of air pollutants (other than vehicle emissions) are associated with the project. As such, the project will not expose sensitive populations to excessive levels of air pollutants.			
e) (Create objectionable odors affecting a su	ubstar	ntial number of people?	
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact	
Diagua	cion/Evalanation:			

Discussion/Explanation:

No Impact: No potential sources of objectionable odors have been identified in association with the proposed project. As such, no impact from odors is anticipated.

IV. BIOLOGICAL RESOURCES -- Would the project:

a)	Have a substantial adverse effect, either on any species identified as a candidate local or regional plans, policies, or regula Fish and Game or U.S. Fish and Wildlife	, sens ations	sitive, or special status species in , or by the California Department of
	Potentially Significant Impact Potentially Significant Unless		Less than Significant Impact No Impact
Discus	Mitigation Incorporated ssion/Explanation:		
No Impact: Based on an analysis of the County's Geographic Information System (GIS) records, the County's Comprehensive Matrix of Sensitive Species, site photos, it has been determined that the site has been completely disturbed and contains no native vegetation or habitats. Therefore, no species identified as a candidate, sensitive, or special status species in local or regional plans, policies, or regulations, or by the California Department of Fish and Game or U.S. Fish and Wildlife Service would be expected to occur on-site.			
b)	Have a substantial adverse effect on any natural community identified in local or rethe California Department of Fish and Garage	egiona	al plans, policies, regulations or by
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact

Discussion/Explanation:

No Impact: County Based on a site visit conducted by County staff, it has been determined that the proposed project site does not contain any riparian habitats or other sensitive natural communities as defined by the County of San Diego Resource Protection Ordinance, Natural Community Conservation Plan, Fish and Game Code, Endangered Species Act, Clean Water Actor any other local or regional plans, policies or regulations. In addition, no riparian or otherwise sensitive habitat has been identified within or adjacent to the area proposed for off-site impacts resulting from road improvements, utility extensions, etc. Therefore, the project is not expected to have direct or indirect impacts from development on any riparian habitat or other sensitive natural community.

c) Have a substantial adverse effect on federally protected wetlands as defined by Section 404 of the Clean Water Act (including, but not limited to, marsh, vernal pool, coastal, etc.) through direct removal, filling, hydrological interruption, or other means?

Discussion/Explanation:

Refer to the attached Ordinance Compliance Checklist dated June 1, 2006 for further information on consistency with any adopted Habitat Conservation Plan, Natural Communities Conservation Plan, other approved local, regional or state habitat conservation plan, including, Habitat Management Plans (HMP) Special Area Management Plans (SAMP) or any other local policies or ordinances that protect biological resources including the Multiple Species Conservation Program (MSCP), Biological Mitigation Ordinance, Resource Protection Ordinance (RPO), Habitat Loss Permit (HLP).

V. CULTURAL RESOURCES -- Would the project:

<u></u>	<u> </u>	p. 0 j 0 0 t.	
a)	Cause a substantial adverse change i as defined in 15064.5?	in the sig	gnificance of a historical resource
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact

Discussion/Explanation:

Potentially Significant Unless Mitigation Incorporated: Based on an analysis of records by County of San Diego staff archaeologist, Gail Wright, it has been determined that there is one historical resource within the project site. This resource includes the Old San Marcos Schoolhouse, which has been restored and is an important cultural, historic and educational facility serving the Twin Oaks Valley and San Marcos area. The schoolhouse was constructed in 1891 and served as an elementary school, grades K through 8, until 1943. An historical resources report titled, "Twin Oaks Memories", dated 2001, and prepared by Edith Bagwell Hughes, evaluated the significance of the historical resources for the Twin Oaks community. These resources are protected because, as a condition of approval of the proposed Major Use Permit, the property owner must submit an application for Historic Landmarking to the County Historic Site Board for review and recommendation. The current project does not propose to alter the existing restored schoolhouse in any way. Because of the mitigation requirement to landmark the historic structure, it has been determined that the project will be protected pursuant to the State of California Environmental Quality Act (CEQA) Guidelines, Section 15064.5. Moreover, because the significant historic resources are completely protected and will not be modified, the project will not contribute to a potentially significant cumulative impact on historical resources.

b) Cause a substantial adverse change in the significance of an archaeological resource pursuant to 15064.5?

	Initial Study, 27, Log No. 03-08-044	- 15 -	August 3, 2006
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact

archae archae	ological records, maps, and aeria	l photograph 2, 2003, it h	Diego archaeology resource files, ns by County of San Diego staff as been determined that the project
•	Directly or indirectly destroy a unique geologic feature?	que paleont	ological resource or site or unique
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact

Less Than Significant Impact: Unique Paleontological Resources - A review of the paleontological maps provided by the San Diego Museum of Natural History, combined with available data on San Diego County's geologic formations indicates that the project is located on geological formations that have low resource potential. Low resource potential is assigned to geologic formations that, based on their relative young age and/or high-energy depositional history, are judged unlikely to produce important fossil remains. Typically, low sensitivity formations produce invertebrate fossil remains in low abundance, which are not considered highly sensitive.

In addition, the project does not propose any grading that will exceed a cut depth of 10 feet. (The project does not propose any grading or construction.) The minimum graded cut depth of 10 feet is the approximate depth at which bedrock is unweathered and is the depth at which unique paleontological resources can typically begin to be found. This excavation guideline is based on professional opinions of paleontological experts from the San Diego Natural History Museum and discussions with City and County of San Diego staff. Therefore, the project will not result in the permanent loss of significant paleontological information. Moreover, the project will not contribute to a cumulatively considerable loss of information, because all projects that exceed a cut depth of 10 feet and will disturb the unweathered bedrock in the areas with high or moderate resource potential are required to have a paleontological monitor present during grading operations.

Unique Geologic Features – The site does contain any unique geologic features that have been catalogued within the Conservation Element (Part X) of the County's General Plan or support any known geologic characteristics that have the potential to support

unique geologic features. Additionally, based on a site visit by staff on staff, no known unique geologic features were identified on the property or in the immediate vicinity.			
,	Disturb any human remains, including th cemeteries?	ose in	terred outside of formal

	OLOGY AND SOILS Would the proje		
	Expose people or structures to potential risk of loss, injury, or death involving:	subst	antial adverse effects, including the
i		oning ostant	Map issued by the State Geologist ial evidence of a known fault?
	Potentially Significant Impact		Less than Significant Impact
	Potentially Significant Unless Mitigation Incorporated	$\overline{\checkmark}$	No Impact
Discuss	sion/Explanation:		
No Impact: The project is not located in a fault rupture hazard zone identified by the Alquist-Priolo Earthquake Fault Zoning Act, Special Publication 42, Revised 1997, Fault-Rupture Hazards Zones in California, or located within any other area with substantial evidence of a known fault. Therefore, there will be no impact from the exposure of people or structures to adverse effects from a known hazard zone as a result of this project.			
i	i. Strong seismic ground shaking?		
	Potentially Significant Impact		Less than Significant Impact
	Potentially Significant Unless Mitigation Incorporated	$\overline{\checkmark}$	No Impact

No Impact: The Uniform Building Code (UBC) and the California Building Code (CBC) classifies all San Diego County with the highest seismic zone criteria, Zone 4. However, the project is not located within 5 kilometers of the centerline of a known active-fault zone as defined within the Uniform Building Code's Maps of Known Active Fault Near-Source Zones in California. In addition, the project will have to conform to the Seismic Requirements -- Chapter 16 Section 162- *Earthquake Design* as outlined within the California Building Code. Section 162 requires a soils compaction report with proposed foundation recommendations to be approved by a County Structural Engineer before the issuance of a building or grading permit. Therefore, there will be no impact from the exposure of people or structures to potential adverse effects from strong seismic ground shaking as a result of this project.

_ F	Seismic-related ground failure, ind Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated	cludin	g liquefaction? Less than Significant Impact No Impact	
Discussio	on/Explanation:			
No Impact: The geology of the project site is identified as Quarternary Alluvuim. This geologic environment is not susceptible to ground failure from seismic activity. In addition, the site is not underlain by poor artificial fill or located within a floodplain. Therefore, there will be no impact from the exposure of people to adverse effects from a known area susceptible to ground failure.				
iv.	Landslides?			
_ F	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact	
Discussio	on/Explanation:			
No Impact: The site is not located within a landslide susceptibility zone. Also, staff has determined that the geologic environment of the project area has a low probability to be located within an area of potential or pre-existing conditions that could become unstable in the event of seismic activity.				
b) Re	esult in substantial soil erosion or the lo	oss of	topsoil?	
_ F	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact	

Discussion/Explanation:

Less Than Significant Impact: According to the Soil Survey of San Diego County, the soils on-site are identified as VaB, Visalia sandy loam, that has a soil erodibility rating of "moderate" as indicated by the Soil Survey for the San Diego Area, prepared by the US Department of Agriculture, Soil Conservation and Forest Service dated December 1973. However, the project will not result in substantial soil erosion or the loss of topsoil for the following reasons:

- The project will not result in unprotected erodible soils; will not alter existing drainage patterns; is not located in a floodplain, wetland, or significant drainage feature; and will not develop steep slopes.
- The project has prepared a Storm water Management Plan for minor projects dated December 18, 2002, prepared by Eric Kallen, Senior Planner.
- The project involves no grading.

Due to these factors, it has been found that the project will not result in substantial soil erosion or the loss of topsoil on a project level.

In addition, the project will not contribute to a cumulatively considerable impact because all the of past, present and future projects included on the list of projects that involve grading or land disturbance are required to follow the requirements of the San Diego County Code of Regulations, Title 8, Zoning and Land Use Regulations, Division 7, Sections 87.414 (DRAINAGE - EROSION PREVENTION) and 87.417 (PLANTING); Order 2001-01 (NPDES No. CAS 0108758), adopted by the San Diego Region RWQCB on February 21, 2001; County Watershed Protection, Storm Water Management, and Discharge Control Ordinance (WPO) (Ord. No. 9424); and County Storm water Standards Manual adopted on February 20, 2002, and amended January 10, 2003 (Ordinance No. 9426). Refer to XVII. Mandatory Findings of Significance for a comprehensive list of the projects considered.

C)	Will the project produce unstable geologimpacts resulting from landslides, latera collapse?	_	
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact

Discussion/Explanation:

No Impact: The project is not located on or near geological formations that are unstable or would potentially become unstable as a result of the project. On a site visit conducted by staff on January 22, 2003, no geological formations or features were

noted that would produce unstable geological conditions as a result of the project. For further information refer to VI Geology and Soils, Question a., i-iv listed above.

d)	Be located on expansive soil, as define Code (1994), creating substantial risks			
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact	
Discu	ussion/Explanation:			
withir revie Agric site a imparident of Sla Composition.	Less Than Significant Impact: The project is located on expansive soils as defined within Table 18-I-B of the Uniform Building Code (1994). This was confirmed by staff review of the Soil Survey for the San Diego Area, prepared by the US Department of Agriculture, Soil Conservation and Forest Service dated December 1973. The soils onsite are VaB, Visalia sandy loam. However, the project will not have any significant impacts because the project is required to comply the improvement requirements identified in the 1997 Uniform Building Code, Division III – Design Standard for Design of Slab-On-Ground Foundations to Resist the Effects of Expansive Soils and Compressible Soils, which ensure suitable structure safety in areas with expansive soils. Therefore, these soils will not create substantial risks to life or property.			
e)	Have soils incapable of adequately sup alternative wastewater disposal system disposal of wastewater?		•	
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact	

Discussion/Explanation:

Less Than Significant Impact: The project is currently using on-site wastewater systems (OSWS), also known as septic systems. The project involves an existing OSWS. Discharged wastewater must conform to the Regional Water Quality Control Board's (RWQCB) applicable standards. However, as a condition of approval of this Major Use Permit, the applicant must hook up to the Vallecitos water main that serves the community and runs along the right of way on Deer Springs Road adjacent to the project.

VII. HAZARDS AND HAZARDOUS MATERIALS -- Would the project:

a) Create a significant hazard to the public or the environment through the routine transport, storage, use, or disposal of hazardous materials or wastes?

	Initial Study, 27, Log No. 03-08-044	- 20 -	August 3, 2006
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporation		Less than Significant Impact No Impact
Discus	sion/Explanation:

	Potentially Significant Impact		Less than Significant Impact	
	Potentially Significant Unless Mitigation Incorporated	$\overline{\checkmark}$	No Impact	
Discuss	sion/Explanation:			
No Impact: The proposed project is not located within a Comprehensive Land Use Plan (CLUP) for airports; or within two miles of a public airport. Also, the project does not propose construction of any structure equal to or greater than 150 feet in height, constituting a safety hazard to aircraft and/or operations from an airport or heliport. Therefore, the project will not constitute a safety hazard for people residing or working in the project area.				
•	f) For a project within the vicinity of a private airstrip, would the project result in a safety hazard for people residing or working in the project area?			
	Potentially Significant Impact		Less than Significant Impact	
	Potentially Significant Unless Mitigation Incorporated	$\overline{\checkmark}$	No Impact	
Discussion/Explanation:				
No Impact: The proposed project is not within one mile of a private airstrip. As a result, the project will not constitute a safety hazard for people residing or working in the project area.				

g) Impair implementation of or physically interfere with an adopted emergency response plan or emergency evacuation plan?

CEQA Initial Study, P02-027, Log No. 03-08-044	- 22 -	August 3, 2006
☐ Potentially Significant Impact☐ Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact

The following sections summarize the project's consistency with applicable emergency response plans or emergency evacuation plans.

OPERATIONAL AREA EMERGENCY PLAN:

Less Than Significant Impact: The Operational Area Emergency Plan is a framework document that provides direction to local jurisdictions to develop specific operational area of San Diego County. It provides guidance for emergency planning and requires subsequent plans to be established by each jurisdiction that has responsibilities in a disaster situation. The project will not interfere with this plan because it will not prohibit subsequent plans from being established.

ii. SAN DIEGO COUNTY NUCLEAR POWER STATION EMERGENCY RESPONSE PLAN

No Impact: The San Diego County Nuclear Power Station Emergency Response Plan will not be interfered with by the project due to the location of the project, plant and the specific requirements of the plan. The emergency plan for the San Onofre Nuclear Generating Station includes an emergency planning zone within a 10-mile radius. All land area within 10 miles of the plant is not within the jurisdiction of the unincorporated County and as such a project in the unincorporated area is not expected to interfere with any response or evacuation.

iii. OIL SPILL CONTINGENCY ELEMENT

No Impact: The Oil Spill Contingency Element will not be interfered with because the project is not located along the coastal zone or coastline.

iv. EMERGENCY WATER CONTINGENCIES ANNEX AND ENERGY SHORTAGE RESPONSE PLAN

No Impact: The Emergency Water Contingencies Annex and Energy Shortage Response Plan will not be interfered with because the project does not propose altering major water or energy supply infrastructure, such as the California Aqueduct.

v. DAM EVACUATION PLAN

No Impact: The Dam Evacuation Plan will not be interfered with because the project is located outside a dam inundation zone.

August 3, 2006

,	h) Expose people or structures to a significant risk of loss, injury or death involving wildland fires, including where wildlands are adjacent to urbanized areas or where residences are intermixed with wildlands?				
	Potentially Significant Impact		Less than Significant Impact		
	Potentially Significant Unless Mitigation Incorporated	V	No Impact		
Discus	sion/Explanation:				
irrigate Availab Marcos District of the p San Ma expose	No Impact: The proposed project is completely surrounded by urbanized areas, and/or irrigated lands and there are no adjacent wildland areas. Also, a Fire Service Availability Letter and conditions, dated May 15, 2006, have been received from the San Marcos Fire Protection District. The conditions from the San Marcos Fire Protection District include: 100 feet of clearing around structures. Therefore, based on the location of the project; review of the project by County staff; and through compliance with the San Marcos Fire Protection District's conditions, it is not anticipated that the project will expose people or structures to a significant risk of loss, injury or death involving hazardous wildland fires.				
i) Propose a use, or place residents adjacent to an existing or reasonably foreseeable use that would substantially increase current or future resident's exposure to vectors, including mosquitoes, rats or flies, which are capable of transmitting significant public health diseases or nuisances?					
	Potentially Significant Impact		Less than Significant Impact		
	Potentially Significant Unless Mitigation Incorporated	V	No Impact		
Discus	sion/Explanation:				

No Impact: The project does not involve or support uses that allow water to stand for a period of 72 hours (3 days) or more (e.g. artificial lakes, agricultural irrigation ponds). Also, the project does not involve or support uses that will produce or collect animal waste, such as equestrian facilities, agricultural operations (chicken coops, dairies etc.), solid waste facility or other similar uses. Moreover, based on a site visit conducted by staff on January 22, 2003, there are none of these uses on adjacent properties. Therefore, the project will not substantially increase current or future resident's exposure to vectors, including mosquitoes, rats or flies.

VIII. HYDROLOGY AND WATER QUALITY -- Would the project:

Violate any waste discharge requirements? a)

Discussion/Explanation:

No Impact: The project does not propose any known sources of polluted runoff. In addition the project does not propose new storm water drainage facilities, nor does the project site contain natural drainage features that would transport runoff off-site.

d)	Substantially deplete groundwater supplies or interfere substantially with groundwater recharge such that there would be a net deficit in aquifer volume or a lowering of the local groundwater table level (e.g., the production rate of pre-existing nearby wells would drop to a level which would not support existing land uses or planned uses for which permits have been granted)?		
	Potentially Significant Impact		Less than Significant Impact
	Potentially Significant Unless Mitigation Incorporated	$\overline{\mathbf{A}}$	No Impact
Discus	ssion/Explanation:		
No Impact: The project will obtain its water supply from the Vallecitos Water District that obtains water from surface reservoirs or other imported water source. The project will not use any groundwater for any purpose, including irrigation, domestic or commercial demands. In addition, the project does not involve operations that would interfere substantially with groundwater recharge including, but not limited to the following: the project does not involve regional diversion of water to another groundwater basin; or diversion or channelization of a stream course or waterway with impervious layers, such as concrete lining or culverts, for substantial distances (e.g. ¼ mile). These activities and operations can substantially affect rates of groundwater recharge. Therefore, no impact to groundwater resources is anticipated.			
e)	Substantially alter the existing drainage through the alteration of the course of a result in substantial erosion or siltation of the course of a result in substantial erosion or siltation of the course of a result in substantial erosion or siltation of the course of	strear	m or river, in a manner which would
	Potentially Significant Impact	\checkmark	Less than Significant Impact
	Potentially Significant Unless Mitigation Incorporated		No Impact

Discussion/Explanation:

Less Than Significant Impact: The project proposes a Major Use Permit for various uses of an existing historic school house site. As outlined in the Storm water Management Plan (Minor Project's form) received December 18, 2002 and prepared by Eric Kallen, the project will implement site design measures and source control BMPs to reduce potential pollutants, including sediment from erosion or siltation, to the maximum extent practicable from entering storm water runoff. The measures will control erosion

- 26 -

and sedimentation and satisfy waste discharge requirements as required by the Land-Use Planning for New Development and Redevelopment Component of the San Diego Municipal Permit (SDRWQCB Order No. 2001-01), as implemented by the San Diego County Jurisdictional Urban Runoff Management Program (JURMP) and Standard Urban Storm Water Mitigation Plan (SUSMP). The SWMP specifies and describes the implementation process of all BMPs that will address equipment operation and materials management, prevent the erosion process from occurring, and prevent sedimentation in any on-site and downstream drainage swales. The Department of Public Works will ensure that the Plan is implemented as proposed. Due to these factors, it has been found that the project will not result in significantly increased erosion or sedimentation potential and will not alter any drainage patterns of the site or area on-or off-site. In addition, because erosion and sedimentation will be controlled within the boundaries of the project, the project will not contribute to a cumulatively considerable impact. For further information on soil erosion refer to VI., Geology and Soils, Question b.

Substantially alter the existing drainage through the alteration of the course of a the rate or amount of surface runoff in a on- or off-site?	strea	m or river, or substantially increase
Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact

Discussion/Explanation:

Less Than Significant Impact: The proposed project will not significantly alter established drainage patterns or significantly increase the amount of runoff for the following reasons, based on a Drainage/Flooding Report prepared by Szytel Engineering dated June 2003:

- a. The project is for a Major Use Permit for various uses for an existing historic schoolhouse site and no new development is proposed.
- b. Drainage will be conveyed to natural drainage channels and existing drainage facilities.
- c. The project will not significantly increase water surface elevation in a watercourse.
- d. The project will not significantly increase surface runoff exiting the project site and no impacts to downstream properties are anticipated.

Therefore, the project will not substantially alter the existing drainage pattern of the site or area, including through the alteration of the course of a stream or river, or substantially increase the rate or amount of surface runoff in a manner which would result in flooding onor off-site. Moreover, the project will not contribute to a cumulatively considerable alteration

	ainage pattern or increase in the rate or am ntially increase water surface elevation or r

	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact
Discus	ssion/Explanation:		
Less Than Significant Impact: The property is adjacent to Stevenson Creek, Deer Springs Creek, and Twin Oaks Valley Creek. Stevenson Creek flows onto the easterly portion of the subject property, adjacent to Deer Springs Road. However, the project is not proposing to place structures with a potential for human occupation within these areas or affect downstream properties. The existing old school house on-site lies entirely outside of and approximately three feet above the calculated 100-year flood area of the Stevenson Creek.			
k)	Expose people or structures to a signification flooding, including flooding as a result of		
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact
Discus	ssion/Explanation:		
No Impact: The project site lies outside any identified special flood hazard area including a mapped dam inundation area for a major dam/reservoir within San Diego County. In addition, the project is not located immediately downstream of a minor dam that could potentially flood the property. Therefore, the project will not expose people to a significant risk of loss, injury or death involving flooding.			
l)	Inundation by seiche, tsunami, or mudf	low?	
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact

i. SEICHE

No Impact: The project site is not located along the shoreline of a lake or reservoir; therefore, could not be inundated by a seiche.

ii. TSUNAMI

No Impact: The project site is located more than a mile from the coast; therefore, in the event of a tsunami, would not be inundated.

iii. MUDFLOW

No Impact: Mudflow is type of landslide. The site is not located within a landslide susceptibility zone. Also, staff has determined that the geologic environment of the project area has a low probability to be located within an area of potential or pre-existing conditions that could become unstable in the event of seismic activity. In addition, though the project does propose land disturbance that will expose unprotected soils, the project is not located downstream from unprotected, exposed soils within a landslide susceptibility zone. Therefore, it is not anticipated that the project will expose people or property to inundation due to a mudflow.

IX. LAND USE AND PLANNING -- Would the project: Physically divide an established community? ☐ Potentially Significant Impact Less than Significant Impact Potentially Significant Unless \square No Impact Mitigation Incorporated Discussion/Explanation: **No Impact:** The project does not propose the introducing new infrastructure such major roadways or water supply systems, or utilities to the area. Therefore, the proposed project will not significantly disrupt or divide the established community. b) Conflict with any applicable land use plan, policy, or regulation of an agency with jurisdiction over the project (including, but not limited to the general plan, specific plan, local coastal program, or zoning ordinance) adopted for the purpose of avoiding or mitigating an environmental effect? Potentially Significant Impact Less than Significant Impact $| \checkmark |$ Potentially Significant Unless No Impact Mitigation Incorporated

Discussion/Explanation:

Less Than Significant Impact: The proposed project is subject to the Regional Land Use Element Policy 1.6 Environmentally Constrained area (ECA) and General Plan Land Use Designation (17) Estate Residential. The project is consistent with the General Plan because a single-family residential use is anticipated by the (17) Estate Residential Land Use Designation that provides for residential use. The project is subject to the policies of the North County Metro Community Plan. The proposed project is consistent with the policies of the North County Metro Community Plan; this project is located within the Twin Oaks Sponsor Group area. The property is zoned A70, Limited Agriculture which permits Civic Use Types with a Major Use Permit pursuant to The Zoning Ordinance Section 2705; therefore, the proposed project is consistent with plan and zone.

X. MINERAL RESOURCES Would the project:			
<u>х. м</u> а)	Result in the loss of availability of a kn value to the region and the residents o		
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact
Discu	ssion/Explanation:		
Less Than Significant Impact: The project site has been classified by the California Department of Conservation – Division of Mines and Geology (Update of Mineral Land Classification: Aggregate Materials in the Western San Diego Production-Consumption Region, 1997) as MRZ-4, which are areas where geologic information does not rule out either the presence or absence of mineral resources. According to geologic maps of the area, the site is underlain by Quaternary alluvium. However, the site is only 2.87 acres and is in a developed area which would preclude the ability to excavate the materials from the site. A mining operation at the project site would create a significant impact to neighboring properties for issues such as noise, air quality, traffic, etc.			
b)	Result in the loss of availability of a loc site delineated on a local general plan,		
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact

Discussion/Explanation:

No Impact: The project site is zoned A70, which is not considered to be an Extractive Use Zone (S82) nor does it have an Impact Sensitive Land Use Designation (24) with an Extractive Land Use Overlay (25) (County Land Use Element, 2000).

XI. NOISE -- Would the project result in:

			
a)	Exposure of persons to or generation of noise levels in excess of standard established in the local general plan or noise ordinance, or applicable star of other agencies?		
	Potentially Significant Impact		Less than Significant Impact
v	Potentially Significant Unless Mitigation Incorporated		No Impact

Discussion/Explanation:

Potentially significant Unless Mitigation Incorporated: The project is a Major Use Permit to allow the operation of a community recreation center and will be occupied by members of the Twin Oaks community for special events on weekends. Based on a site visit completed by staff on January 22, 2003 and as described in the Noise Analysis prepared by Investigative Science and Engineering and dated October 18, 2005, the surrounding area supports agriculture and is occupied by scattered rural residential farms. The project will not expose people to potentially significant noise levels that exceed the allowable limits of the County of San Diego General Plan, County of San Diego Noise Ordinance, and other applicable standards for the following reasons: The project is for a Major Use Permit to use an existing facility for community activities and will only be used on weekends. Traffic noise from Deer Springs Roads will not be an issue for this project since it will be used only on weekends. To ensure that the potentially significant noise from the facility are controlled, as on-going conditions of the project, the applicant shall comply with the following:

- 1. Limit the recreational/social events held at the Old San Marcos Schoolhouse to Saturdays and Sundays between the hours of 8:00 a.m. and 10:00 p.m.
- 2. All personnel, maintenance staff, visitors, and their vehicles shall not be allowed on the premises after 10:00 p.m. or before 7:00 a.m. at any time.
- 3. Prohibit the permanent installation of exterior noise generating equipment such as air conditioners without a modification of this use permit.
- 4. Prohibit the use of sound amplifying devices such as a public address system or speakers at any outdoor location on the project site.
- 5. Limit the total number of participants at these recreational or social events to 150 at any time on the project site.

General Plan – Noise Element

The County of San Diego General Plan, Noise Element, Policy 4b addresses noise sensitive areas and requires an acoustical study to be prepared for any use that may expose noise sensitive area to noise in excess of a Community Noise Equivalent Level (CNEL) of 60 decibels (dBA). Moreover, if the project is excess of CNEL 60 dB(A),

modifications must be made to project to reduce noise levels. Noise sensitive areas include residences, hospitals, schools, libraries or similar facilities where quiet is an important attribute. Based on a Noise Analysis prepared by Investigative Science and Engineering and dated October 18, 2008 project implementation will not expose existing or planned noise sensitive areas to road, airport, heliport, railroad, industrial or other noise in excess of the CNEL 60 dB(A). Therefore, the project will not expose people to potentially significant noise levels that exceed the allowable limits of the County of San Diego General Plan, Noise Element.

Noise Ordinance - Section 36-404

Based on a Noise Analysis prepared by Investigative Science and Engineering and dated October 18, 2006, non-transportation noise generated by the project is not expected to exceed the standards of the County of San Diego Noise Ordinance (Section 36-404) at or beyond the project's property line. The site is zoned A70 that has a one-hour average sound limit of 50 dBA. The adjacent properties are zoned A70 and have one-hour average sound limit of 50 dBA. The Noise Analysis state's the project's noise levels will not exceed County Noise Standards.

Noise Ordinance – Section 36-410

Based on a Noise Analysis prepared by Investigative Science and Engineering and dated October 18, 2005, the project will not generate construction noise that may exceed the standards of the County of San Diego Noise Ordinance (Section 36-410). Construction operations will occur only during permitted hours of operation pursuant to Section 36-410. No grading or construction is proposed by this project.

Finally, the project's conformance to the County of San Diego General Plan (Noise Element, Policy 4b and County of San Diego Noise Ordinance (Section 36-404 and 36.410) ensures the project will not create cumulatively considerable noise impacts, because the project will not exceed the local noise standards for noise sensitive areas; and the project will not exceed the applicable noise level limits at the property line or construction noise limits, derived from State regulation to address human health and quality of life concerns. Therefore, the project will not contribute to a cumulatively considerable exposure of persons or generation of noise levels in excess of standards established in the local general plan, noise ordinance, and applicable standards of other agencies.

Exposure of persons to or generation of groundborne noise levels?	exces	ssive groundborne vibration or
Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact

Discussion/Explanation:

No Impact: The project does not propose any of the following land uses that can be impacted by groundborne vibration or groundborne noise levels.

- 1. Buildings where low ambient vibration is essential for interior operation, including research and manufacturing facilities with special vibration constraints.
- 2. Residences and buildings where people normally sleep including hotels, hospitals, residences and where low ambient vibration is preferred.
- 3. Civic and institutional land uses including schools, churches, libraries, other institutions, and quiet office where low ambient vibration is preferred.
- 4. Concert halls for symphonies or other special use facilities where low ambient vibration is preferred.

Also, the project does not propose any major, new or expanded infrastructure such as mass transit, highways or major roadways or intensive extractive industry that could generate excessive groundborne vibration or groundborne noise levels on-site or in the surrounding area.

c)	A substantial permanent increase in above levels existing without the pro-		noise levels in the project vicinity
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated	✓	Less than Significant Impact No Impact

Discussion/Explanation:

Less Than Significant Impact: The project involves the following permanent noise sources that may increase the ambient noise level: noise generated from weekend events such as wedding receptions. As indicated in the response listed under Section XI Noise, Question a., the project would not expose existing or planned noise sensitive areas in the vicinity to a substantial permanent increase in noise levels that exceed the allowable limits of the County of San Diego General Plan, County of San Diego Noise Ordinance, and other applicable local, State, and Federal noise control. Also, the project is not expected to expose existing or planned noise sensitive areas to noise 10 dB CNEL over existing ambient noise levels based on a Noise Analysis prepared by Investigative Science and Engineering and dated October 18, 2005. The project will not increase the ambient noise level because no amplification of music or other speakers would be allowed. Studies completed by the Organization of Industry Standards (ISO 362; ISO 1996 1-3; ISO 3095; and ISO 3740-3747) state an increase of 10 dB is perceived as twice as loud and is perceived as a significant increase in the ambient noise level.

The project will not result in cumulatively noise impacts because a list of past, present and future projects within in the vicinity were evaluated. It was determined that the project in combination with a list of past, present and future project would not expose existing or planned noise sensitive areas to noise 10 dB CNEL over existing ambient

	, G			
	levels. Refer to XVII. Mandatory Findings projects considered.	s of Si	gnificance for a comprehensive list	
d)	A substantial temporary or periodic increase in ambient noise levels in the project vicinity above levels existing without the project?			
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact

tempo but no	Than Significant Impact: The project do brary or periodic increases in ambient noise that it is to outdoor sound systems. How that, the applicant shall comply with the follo	se leve ever,	els in the project vicinity including	
1.	Limit the recreational/social events held at the Old San Marcos Schoolhouse to Saturdays and Sundays between the hours of 8:00 a.m. and 9:30 p.m.			
2.	All personnel, maintenance staff, visitors, and their vehicles shall not be allowed on the premises after 10 pm or before 7 am at any time.			
3.	Prohibit the permanent installation of exterior noise generating equipment such as air conditioners without a modification of this use permit.			
4.	Prohibit the use of sound amplifying devices such as a public address system or speakers at any outdoor location on the project site.			
No gra	ading or construction is proposed for this	projec	rt.	
e)	For a project located within an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project expose people residing or working in the project area to excessive noise levels?			
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact	

Discussion/Explanation:

No Impact: The proposed project is not located within a Comprehensive Land Use Plan (CLUP) for airports or within 2 miles of a public airport or public use airport. Therefore, the project will not expose people residing or working in the project area to excessive airport-related noise levels.

f)	For a project within the vicinity of a private people residing or working in the project		• • • • • • • • • • • • • • • • • • • •	
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact	
Discussion/Explanation:				
No Impact: The proposed project is not located within a one-mile vicinity of a private airstrip; therefore, the project will not expose people residing or working in the project area to excessive airport-related noise levels.				
XII. POPULATION AND HOUSING Would the project: Induce substantial population growth in an area, either directly (for example, by proposing new homes and businesses) or indirectly (for example, through extension of roads or other infrastructure)?				
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact	

Discussion/Explanation:

No Impact: The proposed project will not induce substantial population growth in an area because the project does not propose any physical or regulatory change that would remove a restriction to or encourage population growth in an area including, but limited to the following: new or extended infrastructure or public facilities; new commercial or industrial facilities; large-scale residential development; accelerated conversion of homes to commercial or multi-family use; or regulatory changes including General Plan amendments, specific plan amendments, zone reclassifications, sewer or water annexations; or LAFCO annexation actions.

b) Displace substantial numbers of existing housing, necessitating the construction of replacement housing elsewhere?

	Initial Study, 7, Log No. 03-08-044	- 36 -	August 3, 2006

No Impact: The proposed project will not displace a substantial number of people since the site is currently used for community events and this use will continue. The property is not a residential development and no additional construction is proposed.			
a) \ t F s	he provision of new or physically a physically altered governmental fa	altered gove cilities, the in order to ace service	
i i	Fire protection?Police protection?Schools?Parks?Other public facilities?		
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact
Discuss	sion/Explanation:		

No Impact: Based on the service availability forms received for the project, the proposed project will not result in the need for significantly altered services or facilities.

Service availability forms have been provided which indicate existing services are available to the project from the following agencies/districts: San Marcos Fire Department and Vallecitos Water District. The project does not involve the construction of new or physically altered governmental facilities including but not limited to fire protection facilities, sheriff facilities, schools, or parks in order to maintain acceptable service ratios, response times or other performance service ratios or objectives for any public services. Therefore, the project will not have an adverse physical effect on the environment because the project does not require new or significantly altered services or facilities to be constructed.

	<u>ECREATION</u>			
a) Would the project increase the use of existing neighborhood and regional parks or other recreational facilities such that substantial physical deterioration of the facility would occur or be accelerated?

XV. TRANSPORTATION/TRAFFIC -- Would the project:

Cause an increase in traffic which is substantial in relation to the existing traffic load and capacity of the street system (i.e., result in a substantial increase in

August 3, 2006

either the number of vehicle trips, the volume to capacity ratio on roads, or congestion at intersections)?					
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact		
Discus	sion/Explanation:				
Less Than Significant Impact:					
DIRECT IMPACTS:					

The proposed project generates 146 ADT (weekend only trips). The project's Traffic Impact Analysis, dated November 2005 by Katz, Okitsu, and Associates was reviewed by the Department of Public Works and the project was determined not to result in a substantial increase in the number of vehicle trips, volume of capacity ratio on roads, or congestion at intersections in relation to existing conditions for the following reasons: The proposed project would not result in a degradation of the level of service (LOS) of affected roadways. Deer Springs Road (SF 1414) is a Collector Road on the San Diego County Circulation Element of the General Plan with a current LOS D (approximately 10,664 ADT) (threshold of 10,900 ADT for LOS D, based upon existing two-lane road). The traffic volume from the project (146 ADT) would not result in any impacts, degradation, or threshold increase on Deer Springs Road, because the project will be conditioned to operate only during weekend hours. The project will have no peak hour weekday intersection impacts. Therefore, the project will not have a significant direct project level impact increase in traffic, which is considered substantial in relation to existing traffic load and capacity of the street system.

CUMULATIVE IMPACTS:

The County of San Diego has developed an overall programmatic solution that addresses existing and projected future road deficiencies in the unincorporated portion of San Diego County. This program includes the adoption of a Transportation Impact Fee (TIF) program to fund improvements to roadways necessary to mitigate potential cumulative impacts caused by traffic from future development. Based on SANDAG regional growth and land use forecasts, the SANDAG Regional Transportation Model was utilized to analyze projected build-out (year 2030) development conditions on the existing circulation element roadway network throughout the unincorporated area of the County. Based on the results of the traffic modeling, funding necessary to construct transportation facilities that will mitigate cumulative impacts from new development was identified. Existing roadway deficiencies will be corrected through improvement projects funded by other public funding sources, such as TransNet, gas tax, and grants. Potential cumulative impacts to the region's freeways have been addressed in SANDAG's Regional Transportation Plan (RTP). This plan, which considers freeway

buildout over the next 30 years, will use funds from TransNet, State, and Federal funding to improve freeways to projected level of service objectives in the RTP.

The proposed project generates 146 ADT (weekend only trips). These trips will be distributed on circulation element roadways in the County that were analyzed by the TIF program, some of which currently or are projected to operate at inadequate levels of service. These project trips therefore contribute to a potential significant cumulative impact and mitigation is required. The potential growth represented by this project was included in the growth projections upon which the TIF program is based. Therefore, payment of the TIF, which will be required at issuance of building permits, in combination with other components of the program described above, will mitigate potential cumulative traffic impacts to less than significant.

DIRECT IMPACTS:

The proposed project generates 146 ADT (weekend only trips). The project's Traffic Impact Analysis, dated November 2005 by Katz, Okitsu, and Associates was reviewed by the Department of Public Works and the project was determined not to result in a substantial increase in the number of vehicle trips, volume of capacity ratio on roads, or congestion at intersections in relation to existing conditions for the following reasons: The proposed project would not result in a degradation of the level of service (LOS) of affected roadways. Deer Springs Road (SF 1414) is a Collector Road on the San Diego County Circulation Element of the General Plan with a current LOS D (approximately 10,664 ADT) (threshold of 10,900 ADT for LOS D, based upon existing two-lane road). The traffic volume from the project (146 ADT) would not result in any impacts, degradation, or threshold increase on Deer Springs Road, because the project will be conditioned to operate only during weekend hours. The project will have no peak hour weekday intersection impacts. Therefore, the project will not have a significant direct project level impact increase in traffic, which is considered substantial in relation to existing traffic load and capacity of the street system.

August 3, 2006

CUMULATIVE IMPACTS:

The County of San Diego has developed an overall programmatic solution that addresses existing and projected future road deficiencies in the unincorporated portion of San Diego County. This program includes the adoption of a Transportation Impact Fee (TIF) program to fund improvements to roadways necessary to mitigate potential cumulative impacts caused by traffic from future development. Based on SANDAG regional growth and land use forecasts, the SANDAG Regional Transportation Model was utilized to analyze projected build-out (year 2030) development conditions on the existing circulation element roadway network throughout the unincorporated area of the County. Based on the results of the traffic modeling, funding necessary to construct transportation facilities that will mitigate cumulative impacts from new development was identified. Existing roadway deficiencies will be corrected through improvement projects funded by other public funding sources, such as TransNet, gas tax, and grants. Potential cumulative impacts to the region's freeways have been addressed in SANDAG's Regional Transportation Plan (RTP). This plan, which considers freeway buildout over the next 30 years, will use funds from TransNet, State, and Federal funding to improve freeways to projected level of service objectives in the RTP.

The proposed project generates 146 ADT (weekend only trips). These trips will be distributed on circulation element roadways in the County that were analyzed by the TIF program, some of which currently or are projected to operate at inadequate levels of service. These project trips therefore contribute to a potential significant cumulative impact and mitigation is required. The potential growth represented by this project was included in the growth projections upon which the TIF program is based. Therefore, payment of the TIF, which will be required at issuance of building permits, in combination with other components of the program described above, will mitigate potential cumulative traffic impacts to less than significant.

For projects that will not require building permits

In order to mitigate its incremental contribution to significant cumulative traffic impacts, the proposed project will be conditioned pay the TIF prior to Use and Reliance on the Permit.

	Potentially Significant Impact		Less than Significant Impact	

Discussion/Explanation:

Potentially Significant Unless

Mitigation Incorporated

No Impact: The proposed project will not result in inadequate emergency access. The San Marcos Fire Department has reviewed the proposed project and has determined that there is adequate emergency fire access. Additionally, roads used to access the proposed project site are up to County standards.

No Impact

f)	I	Result in inadequate parking capacity?		
		Potentially Significant Impact	$\overline{\checkmark}$	Less than Significant Impac
		Potentially Significant Unless Mitigation Incorporated		No Impact

Discussion/Explanation:

Less Than Significant Impact: The Zoning Ordinance Section 6766 Parking Schedule requires provision for on-site parking spaces based upon the maximum number of persons permitted to occupy the premise. The project description provides an analysis for the total parking requirement for the proposed project. Fifty seven (57) spaces are proposed; this is consistent with the requirements of the Parking Schedule (one space for every four visitors; this project will limit guests to 150). Therefore, the proposed project is providing sufficient on-site parking capacity when considering the type of use and number of employees.

g) Conflict with adopted policies, plans, or programs supporting alternative transportation (e.g., bus turnouts, bicycle racks)?				
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact	
Discuss	sion/Explanation:			
Less Than Significant: The project does not propose any hazards or barriers for pedestrians or bicyclists. Any required improvements will be constructed to maintain existing conditions as it relates to pedestrians and bicyclists.				
 XVI. UTILITIES AND SERVICE SYSTEMS Would the project: a) Exceed wastewater treatment requirements of the applicable Regional Water Quality Control Board? 				
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact	
D:	sian /Eurolanatian.			

Discussion/Explanation:

Less Than Significant Impact: The project proposes to discharge domestic waste to on-site wastewater systems (OSWS), also known as septic systems. The project involves one on-site wastewater system. Discharged wastewater must conform to the Regional Water Quality Control Board's (RWQCB) applicable standards, including the Regional Basin Plan and the California Water Code. California Water Code Section 13282 allows RWQCBs to authorize a local public agency to issue permits for OSWS "to ensure that systems are adequately designed, located, sized, spaced, constructed and maintained." The RWQCBs with jurisdiction over San Diego County have authorized the County of San Diego, Department of Environmental Health (DEH) to issue certain OSWS permits throughout the County and within the incorporated cities. DEH has reviewed the OSWS lay-out for the project pursuant to DEH, Land and Water

Quality Division's, "On-site Wastewater Systems: Permitting Process and Design Criteria." DEH approved the project's OSWS as DEH #VS0688 with the requirement that the project be connected to Vallecitos Water District sewer system, which has approved the hookup to existing sewer lines that front the project property. Therefore, the project is consistent with the wastewater treatment requirements of the RWQCB as determined by the authorized, local public agency.

,	Require or result in the construction of n facilities or expansion of existing facilitie significant environmental effects?

	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact
Discuss	sion/Explanation:		

Less Than Significant Impact: Implementation of the project will generate solid waste. All solid waste facilities, including landfills require solid waste facility permits to operate. In San Diego County, the County Department of Environmental Health, Local Enforcement Agency issues solid waste facility permits with concurrence from the California Integrated Waste Management Board (CIWMB) under the authority of the Public Resources Code (Sections 44001-44018) and California Code of Regulations

Title 27, Division 2, Subdivision 1, Chapter 4 (Section 21440et seq.). There are five, permitted active landfills in San Diego County with remaining capacity. Therefore, there is sufficient existing permitted solid waste capacity to accommodate the project's solid waste disposal needs.

g)	Comply with federal, state, and loc waste?	al statutes	and regulations related to solid
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact

Discussion/Explanation:

Less than Significant Impact: Implementation of the project will generate solid waste. All solid waste facilities, including landfills require solid waste facility permits to operate. In San Diego County, the County Department of Environmental Health, Local Enforcement Agency issues solid waste facility permits with concurrence from the California Integrated Waste Management Board (CIWMB) under the authority of the Public Resources Code (Sections 44001-44018) and California Code of Regulations Title 27, Division 2, Subdivision 1, Chapter 4 (Section 21440et seq.). The project will deposit all solid waste at a permitted solid waste facility and therefore, will comply with Federal. State, and local statutes and regulations related to solid waste.

XVII. MANDATORY FINDINGS OF SIGNIFICANCE:

a)	Does the project have the potential substantially reduce the habitat of a wildlife population to drop below selplant or animal community, substantial of a rare or endangered plant or animajor periods of California history or	fish or wi f-sustainir tially redu mal or elir	Idlife species, cause a fish or ng levels, threaten to eliminate a ce the number or restrict the range minate important examples of the
	Potentially Significant Impact		Less than Significant Impact
Ī,	Potentially Significant Unless		No loop act

No Impact

Discussion/Explanation:

Mitigation Incorporated

 \square

Per the instructions for evaluating environmental impacts in this Initial Study, the potential to degrade the quality of the environment, substantially reduce the habitat of a fish or wildlife species, cause a fish or wildlife population to drop below self-sustaining levels, threaten to eliminate a plant or animal community, reduce the number or restrict the range of a rare or endangered plant or animal or eliminate important examples of the major periods of California history or prehistory were considered in the response to each question in sections IV and V of this form. In addition to project specific impacts,

this evaluation considered the projects potential for significant cumulative effects. Resources that have been evaluated as significant would be potentially impacted by the project, particularly Cultural Resources. However, mitigation has been included that clearly reduces these effects to a level below significance. This mitigation includes the condition that the property owner must submit an application for Historic Landmarking to the County Historic Site Board for review and recommendation. The current project does not propose to alter the existing restored schoolhouse in any way. As a result of this evaluation, there is no substantial evidence that, after mitigation, significant effects associated with this project would result. Therefore, this project has been determined not to meet this Mandatory Finding of Significance.

, ; ;	Does the project have impacts that are considerable? ("Cumulatively consider a project are considerable when viewe projects, the effects of other current proposects)?	able" m	neans that the incremental effects of nnection with the effects of past
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact

Discussion/Explanation:

The following list of past, present and future projects were considered and evaluated as a part of this Initial Study:

PROJECT NAME	PERMIT/MAP NUMBER	
SP 04-006	Merriam Mountain Development	
TPM 20846	Pizzuto 3-lot split	
P02-019	T.E.R.I Project	
P05-003	Solar View	
P03-003	Pine Valley Community Church	

Per the instructions for evaluating environmental impacts in this Initial Study, the potential for adverse cumulative effects were considered in the response to each question in sections I through XVI of this form. In addition to project specific impacts, this evaluation considered the projects potential for incremental effects that are cumulatively considerable. As a result of this evaluation, there were determined to be potentially significant cumulative effects related to **traffic**. However, mitigation has been included that clearly reduces these cumulative effects to a level below significance. This mitigation includes payment of the Traffic Impact Fee (TIF). As a result of this evaluation, there is no substantial evidence that, after mitigation, there are cumulative effects associated with this project. Therefore, this project has been determined to not meet this Mandatory Finding of Significance.

CEQA Initial Study,				
P02-027, Log No. 03-08-044				

- 47 -

August 3, 2006

c)	Does the project have environmental effects, which will cause substantial adverse effects on human beings, either directly or indirectly?				
✓	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact		

Discussion/Explanation:

In the evaluation of environmental impacts in this Initial Study, the potential for adverse direct or indirect impacts to human beings were considered in the response to certain questions in sections I. Aesthetics, III. Air Quality, VI. Geology and Soils, VII. Hazards and Hazardous Materials, VIII Hydrology and Water Quality XI. Noise, XII. Population and Housing, and XV. Transportation and Traffic. As a result of this evaluation, there were determined to be potentially significant effects to human beings related to the following: **noise**. However, mitigation has been included that clearly reduces these effects to a level below significance. This mitigation includes the following:

- Limit the recreational/social events held at the Old San Marcos Schoolhouse to Saturdays and Sundays between the hours of 8:00 a.m. and 10:00 p.m.
- All personnel, maintenance staff, visitors, and their vehicles shall not be allowed on the premises after 10:00 p.m. or before 7:00 a.m. at any time.
- Prohibit the permanent installation of exterior noise generating equipment such as air conditioners without a modification of this use permit.
- Prohibit the use of sound amplifying devices such as a public address system or speakers at any outdoor location on the project site.
- Limit the total number of participants at these recreational or social events to 150 at any time on the project site.

As a result of this evaluation, there is no substantial evidence that, after mitigation, there are adverse effects to human beings associated with this project. Therefore, this project has been determined not to meet this Mandatory Finding of Significance.
